Safety briefing

Fire protection

BGV A3 survey

General safety  
Protective clothing and equipment etc.

Company doctor  
First aid

Exhaust and air supply units with particle filtration

Copper

Separation at recycling units

Recycling of rejects

PVC

PVC

Start-up PVC waste

Re-granulate

PE

RoHS and Reach

Hazardous waste such as copper sludge, waste oil, additives...

Separation and disposal of waste by certified waste management companies

Wood

Plastic tape

Residual waste

General energy saving measures  
Optimized illumination and electric motors  
IE2 ->IE3

Renewable energy  
3 water turbines generating electricity

Introduction of spring water in the water circuit to reduce charging of public mains supply

Treatment of cooling water  
Permanent recirculation through cooling towers and filtering of the water
