POP Compliance Statement on Regulation (EU) 2019/1021 (Persistent Organic Pollutants)

Regulation (EU) 2019/1021 of the European Parliament and of the Council of 20 June 2019 on persistent organic pollutants (POP Regulation) entered into force on 15 July 2019 and transposes the Stockholm Convention on Persistent Organic Pollutants into European law. Persistent organic pollutants – known as POPs – are organic chemicals characterised by their long-lived nature (persistence), which accumulate in organisms and thus in the food chain (bioaccumulation and biomagnification) and have harmful effects on the health of humans and animals.

The regulations of the POP Regulation apply to substances contained in Annexes I and II. Annex I contains the list of banned substances and Annex II the list of substances subject to restrictions.

The POP Regulation prohibits or restricts the manufacture, placing on the market and use of substances listed in Annex I. These prohibitions and restrictions also apply to mixtures or articles containing such substances. Furthermore, it regulates the disposal of waste containing POPs.

You can access the current version of the regulation at:

<https://eur-lex.europa.eu/legal-content/DE/TXT/?qid=1579084873421&uri=CELEX:32019R1021>

A list of the substances covered by the POP Regulation can currently be found at the following source:

<https://echa.europa.eu/de/list-of-substances-subject-to-pops-regulation>

Based on the information currently available to, we hereby declare, to the best of our knowledge, that our products comply with the POP Regulation and do not contain any substances subject to the prohibitions or restrictions set out in Annex I to Regulation (EU) 2019/1021.

This information does not constitute a legal claim and all information is based only on the information provided and is neither controlled nor monitored.
